<sup>7</sup> EU Clinical Trials Register. Last accessed November 2022. Available at: <https://www.clinicaltrialsregister.eu/>

\*Treating to 70% of the estimated prevalence of patients means increasing rates of diagnosis meaning that the percentage of patients increases by 30% from 40-70 leading to a higher number of patients being treated in the health system).

\*\*Adult patient population is calculated by multiplying the ADHD prevalence rate from Faraone et al, 2021 by the country's 18-65 population data (see endnotes).
